

AO CMF Course— Management of Facial Trauma

June 17–18, 2024 Bratislava, Slovakia

Course description

Register now for our world-class course, designed to equip you with fundamental knowledge, principles, and skills essential for treating craniomaxillofacial fractures and their associated complications. This comprehensive program covers mid and upper facial trauma, mandibular trauma, and specialized topics. Participants will engage in hands-on practical exercises, online learning modules, small group discussions, and informative lectures.

Target participants

Surgeons, residents, and fellows who are involved in the treatment of facial trauma.

Course modules

Mid and upper facial trauma

- Surgical approaches
- Reestablishing pre-traumatic occlusion
- Maxillary, Zygomatic and Orbital wall , NOE and Frontal sinus fractures

Mandibular trauma

- Surgical approaches
- Mandibular fractures: load sharing and load bearing

Additional topics

- Pediatric fractures and sequencing panfacial fractures
- Complications

Learning objectives

- Diagnose facial injury through history, physical examination, and investigations
- Formulate a treatment plan (operative and nonoperative)
- Perform the specific treatment for facial trauma
- Modify the treatment plan when necessary
- Manage patient follow-up and rehabilitation
- Identify and manage complications
